Fixing template — sheet 1 of 2 (left half)

Printed actual size — 520 × 111mm plate

Print both sheets and butt this sheet's right edge to sheet 2's left edge, matching the ticks, to recreate the full plate width.

LEFT HALF — JOINS TO SHEET 2 ON THE RIGHT

Sticky pad position Screw hole guide

Once both sheets are joined, place your new plate face-down on top, matching its edges to the dashed outline. Mark pad and screw positions through onto the sheet, or press pads directly using the guide beneath. Using screws? Line up your old plate on top first and mark through the existing holes — the fastest way to get placement right first time.

Fixing template — sheet 2 of 2 (right half)

Printed actual size — 520 × 111mm plate

Join this sheet's left edge to sheet 1's right edge, matching the ticks, to complete the template.
